DETAILED ACTION

Election/Restrictions

1. The amendment filed on 8/14/03 canceling all claims drawn to the elected invention and presenting only claims drawn to non-elected inventions is non-responsive (MPEP § 821.03).

The remaining claims are not readable on the elected invention.

2. Newly submitted claims 32-61 are directed to inventions that are independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 32-41, drawn to a screening device, classified in class 435, subclass 287.1.
- II. Claims 42-52, drawn to a method of performing a screening test, classified in class 435, subclass 4.
- III. Claims 53-61, drawn to a screening assembly, classified in class 436, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions require different elements and/or different steps. Specifically, the method of Group II and assembly of Group III require a cartridge having a window through which a portion of the membrane is exposed, which is not required of device of Group I. In addition, the receiving bracket of Group III is not required of Group II. ***Further, the three presently pending groups differ from the originally elected group (claims 1-17), as the originally elected group was drawn to a screening device and method, wherein the device required multiple data***

Art Unit: 1641

processors and the method required the segmenting of data, which are not required of any of the presently pending groups.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and the search required for one group is not required of the others, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 32-61 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
